

Causes of Neuropathy

Peripheral Neuropathy can be caused by many medical conditions including:

Diabetes	CMT	Plantar Fasciitis	Phantom Limb
Fibromyalgia	CRPS	Radiculopathy	Neuritis
Restless Leg Syndrome	TTS/CTS	Inflammatory Conditions	Vascular Conditions
Viral Infection	MS	Post-op pain	Migraines

As these conditions progress, they can result in pain, numbness, burning and/or tingling in the arms, hands, feet or legs. These are all symptoms of peripheral neuropathy.

Specialized Treatment

We are **accredited specialists in the cutting-edge NEUROGENX Electronic Signal Treatment (EST) Technology**. Our expertise is dedicated to helping you regain improved feeling, range-of-motion and balance so you can get back to doing the things you enjoy.

Until now, nerve conditions have been very difficult to treat effectively. The **NEUROGENX** treatment technology changes that. This is NOT pain management - it is a proven, restorative treatment that is **effective for more than 4 out of 5 patients!**

The **NEUROGENX** EST technology provides a clinically proven, successful treatment for neuropathy and chronic nerve conditions that affect both the upper and lower extremities.

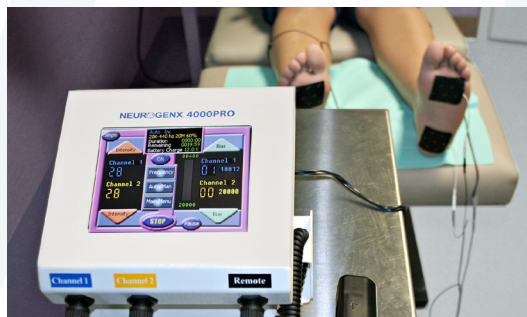

What is EST?

NEUROGENX EST technology is patented and FDA-cleared **as the only treatment of its kind**. There is no surgery, no injections and no narcotics that just mask the symptoms. Neurogenx technology is using safe electronic waves that penetrate deep tissue and affect change at the cellular level.

What to Expect

We begin with a comprehensive exam and medical history so we fully understand the details of your condition. Our specially-trained, caring medical professionals will gently examine your hands, arms, wrists, feet, ankles and legs for pain, numbness, burning and tingling as well as evaluate your strength, range-of-motion and balance.

Your evaluation finishes with a complete explanation of the exclusive medical protocol and the details of your **personal treatment plan**.

How Long Does It Take?

- The initial evaluation takes less than an hour.
- Treatment sessions normally take about 45 minutes to one hour.
- Symptoms typically resolve quickly. Based on your condition and its severity, you can expect results within 8-12 weeks, over the course of several treatments.

Start Today & Get Your Life Back!

The Neurogenx treatment has improved the quality of life for thousands of patients around the country. Call to schedule your evaluation and see if it can do the same for you.

In more than **4 out of 5 patients**, treatment with **NEUROGENX** resolved neuropathy symptoms & restored function!

*Tingling Pain
Burning
Numbness*

NEUROPATHY

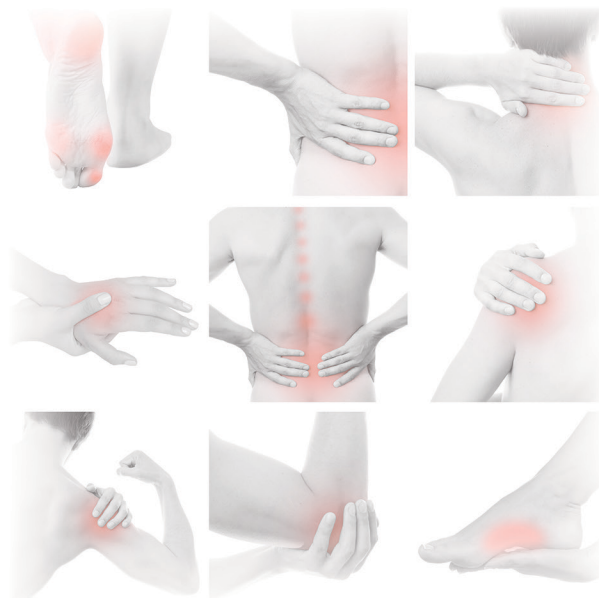

No Longer Has to Compromise
Your Quality of Life.

The sooner you can start treatment, the greater the chance that nerve damage can be slowed or reversed . . . and the better your prognosis will be.

However, even patients who have suffered from neuropathy for years have had their symptoms resolved or significantly improved with the Neurogenx treatment.

A better life is just a call away...

Contact us and find out how we can help you get moving again!
